Lady Malcolm Douglas Hamilton

New York City, N. Y.

Dear Lady Hamilton:

I want you to know how much I appreciate your thoughtful message and kind remarks concerning my brother.

Upon receipt of your suggestion dealing with the work of Dr. Albert Szent-Gyorgi, I promptly brought it to the attention of the doctors at the National Institutes of Health who, of course, are in constant consultation with the Walter Reed physicians responsible for my brother's care. The NIH doctors advised of their familiarity with, and consideration of Dr. Szent-Gyorgi's work and stated that they are always interested in new scientific information. They also advised me that it is the prerogative of a research scientist to reveal unpublished research only at his discretion. Hence, if Dr. Szent-Gyorgi wishes to make known the results of such work to the NIH consultants to my brother, they would be very happy to review it.

Again many thanks for your thoughtfulness and every best wish.

Faithfully,

SIGNED

9 Commercial Avenue  
Cambridge 41, Massachusetts

Dear Dr. Homburger:

I want to give you a further follow-up on your letter of March 5 and your kind offer to provide suggestions about the treatment of my brother's illness.

As I indicated to you previously, I have forwarded the materials you sent to his physicians. They have informed me that they will be happy to discuss Dr. Apffel's work with you if later work continues to show promise.

Again, my sincere appreciation for your interest.

Faithfully,

SIGNED

STAT

Prof. Albert Szent-Gyorgi, world famous Nobel prize winner and discoverer and isolator of Vitamin C, and head of the Institute for Muscle Research at Woodshole, Massachusetts, has extraordinary cancer cure which is fully effective on animals. Clinical treatments not yet begun but in 22 hopeless human cases has been effective.

I know that Dr. Szent-Gyorgi has greatest admiration and respect for your brother and would be proud and happy to have this medication used. You realize however that scientists doing basic research cannot offer their services nor have they the right to talk about their results to outsiders, but as the Institute for Muscle Research is supported by the National Institute of Health, I do urge you to approach them.
